

New Mexico Consortium
IBC Activity Modification Form

NAME OF PRINCIPAL INVESTIGATOR: _____

APPLICATION NO: _____

APPLICATION TITLE: _____

RESEARCH TYPE (check all that apply):

- Cell Culture, Environmental samples, Plant (Greenhouse), Molecular Biology, Animal husbandry, Plant (Field), Recombinant DNA (animal or plant), Wildlife/Arthropods, Other: _____

Minor Modifications:

- This project involves proprietary or confidential business information.
Personnel added (List new personnel & attach training and experience record form)
Personnel terminated (List personnel no longer involved)
Change in biological materials - project no longer uses: live animals, potentially infectious agents or pathogens, use of recombinant DNA
Laboratory is being renovated and the project is suspended until completion of renovation.
Laboratory is moving to another floor or building. Please identify new location.
Project is voluntarily suspended (due to sabbatical, minor lab renovation, or project is awaiting funding).
Project is no longer active. End Date
Change/addition of funding: Funding Agency
Title:
OGC Institution # or Grant/Contract #
Minor changes in procedures
Other:

Major Modifications

- Substantial changes in the IBC-approved procedures (new technology or novel R-DNA construct) or initial acquisition of new organisms or toxins.
Change in Principal Investigator. The new PI must submit an IBC Application for the project.
Research project expanded to include live animals. Submit a new IBC application.
BSL-1 research project expanded to include acquisition of potentially infectious agents or pathogens for use at BSL-2.
Project expanded to include recombinant DNA. Submit a new IBC application
Other:

PI Signature _____ Date _____
